**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-10, drawn to a hybrid circuit used in connect with the transmitter side particularly, classified in class 375, subclass 295.
  - II. Claims 11-14, drawn to method for receiving signal in particular, classified in class 375, subclass 316.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as it can be used independently from the transmitting side regardless it receives the signal from the same subscriber line that is used for transmitting. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.
